SUMMARY

Frontend Developer with 1.5+ years of experience building responsive, production-grade web applications with React, Next.js, Angular, and TypeScript in Agile/Scrum teams. Strong in RESTful API integration, reusable component architecture, and frontend performance optimization, with additional full-stack experience building APIs and data models using Node.js, NestJS, Laravel, MongoDB, and MySQL. Seeking Frontend Developer or Full-Stack Developer opportunities.

SKILLS

- **Languages:** JavaScript (ES6+), TypeScript, PHP, HTML5, CSS3
- **Frontend:** React, Next.js, Angular, Tailwind CSS, Bootstrap, TanStack Query, Axios, responsive design, reusable components
- **Backend:** Node.js, Express.js, NestJS, Laravel, RESTful API development and integration
- **Databases:** MongoDB, MySQL
- **Tools and Practices:** Git, GitHub, Agile/Scrum, Figma-to-code implementation, state management, cross-browser compatibility, performance optimization

PROFESSIONAL EXPERIENCE

Frontend Developer, Infotech Global · July 2025 – March 2026

- Improved page-load time by 35% on API-driven pages through caching and lazy loading.
- Developed and shipped frontend features for Wazifame, a full-stack recruitment platform, across multiple release cycles.
- Integrated NestJS RESTful APIs with the React frontend using TanStack Query and supported cross-browser compatibility.

Frontend React Intern, ABS.AI · January 2025 – March 2025

- Translated Figma designs into responsive, production-ready React and Tailwind CSS components.
- Delivered dynamic React features within an Agile team, participating in daily stand-ups, sprint planning, and code reviews.

Frontend Angular Intern, Yearex Group · September 2024 – December 2024

- Built a reusable Angular component library that reduced duplicated UI code by 20% and accelerated page development.
- Redesigned the company website using reusable, responsive Angular components to improve maintainability and visual consistency.

Summer IT Trainee, QNB Al-Ahli · June 2019 – July 2019

- Rotated across IT department teams during a summer traineeship at a major Egyptian bank, gaining hands-on exposure to enterprise systems, business workflows, and technology operations.

PROJECTS

E-commerce Platform (Full-Stack) | React, Swiper, Laravel, MySQL | Live Demo

- Built a full stack e-commerce application with a React frontend for product discovery and cart management, backed by a Laravel API.
- Designed and integrated Laravel RESTful APIs with MySQL for product, cart, and order management.

Ayno (Frontend) | Next.js, Tailwind CSS | Live Demo

- Contributed to the user interface of an open-source real-time platform designed to support high concurrency and low latency.
- Refined layouts, reusable components, and responsive behavior across devices.

EventBook (Full-Stack) | React, Tailwind CSS, Swiper, Axios, Node.js, Express, MongoDB | Live Demo

- Built a full stack ticket-booking platform with an end-to-end attendee booking flow, from React UI to Node.js/Express APIs and MongoDB.
- Connected frontend components to REST APIs and MongoDB data models, covering both frontend and backend development.

News Today (Full-Stack) | React, Tailwind CSS, Axios, NestJS, MongoDB | Live Demo

- Developed a NestJS RESTful API (Node.js) that serves cached news data, reducing redundant requests and improving load performance, and integrated it with a React frontend for end-to-end delivery.

Travel Booking Platform - Jubari Clone (Full-Stack) | Angular, Bootstrap, Laravel, MySQL | Live Demo

- Built a full stack travel-booking platform with destination discovery, search, filtering, and reservations, using Laravel REST APIs and MySQL.
- Developed responsive Angular interfaces using reusable components, integrated with the backend API.

Adidas Clone (Frontend) | Angular, Bootstrap | Live Demo

- Implemented a responsive e-commerce interface with reusable components for product listings, product details, and cart views.

Finexo (Frontend) | HTML, CSS, Bootstrap, JavaScript | Live Demo

- Built a fully responsive corporate website with a reusable, component-based layout.

EDUCATION

Bachelor's Degree in Computer Engineering, Modern Sciences & Arts University (MSA) · 2018 – 2023

IGCSE, Orouba Language Schools · 2015 – 2018

CERTIFICATIONS

Full-Stack Web Development Certificate, YAT Learning Centers · August 2024

- Completed training in HTML, CSS, Bootstrap, JavaScript, PHP, and MySQL.

Tech Track Certificate, Digitera Program (iCareer) · July 2026

- Completed the Tech Track program under the Youth Inclusion and Employment Program, Ready for Tomorrow.
