SUMMARY

Computer Engineer with a solid foundation in both frontend and backend development, complemented by hands-on experience delivering diverse web-based projects. Proficient in building responsive, user-centric applications and collaborating effectively within cross-functional teams to achieve high-quality outcomes. Demonstrates strong adaptability to emerging tools and technologies, coupled with a commitment to continuous professional development and staying aligned with industry advancements. Eager to contribute a versatile technical skill set and a solution-oriented engineering mindset to a forward-thinking development team.

EDUCATION

2018 – 2023	Bachelor Degree in Computer Engineering <i>Modern Sciences & Arts Uiversity</i>
2018 – 2023	Bachelor Of Science in Computer Engineering <i>Greenwich University</i>
2015 – 2018	IGCSE <i>Orouba Language Schools</i>

Courses

Full Stack Developer

YAT Learning Center

Comprehensive certification: HTML, CSS, JavaScript, PHP, MySQL, Bootstrap. Frontend and backend foundations for dynamic, responsive web applications.

Skills

HTML	CSS
Bootstrap	Tailwind
Java Script	Type Script
React	Angular
Next JS	Node JS
Nest JS	Mongo DB
MYSQL	Github

Professional Experience

- 06/2019 – 07/2019 **Summer IT Trainee**
QNB AL-AHLI
We got introduced to different sections of the IT department, and we knew more about the ways problems are solved and new technologies of each field.
- 09/2024 – 12/2024 **Front End Internship**
Yearex Group
- Redesigned company website using Angular, implementing reusable, responsive UI components
 - Improved usability and reduced future development time by creating a component library
- 01/2025 – 03/2025 **React Intern**
ABS.AI
- Built and shipped multiple dynamic web applications using React within an agile environment
 - Partnered with UI/UX designers to translate designs into responsive, accessible frontend components
- 07/2025 – 03/2026 **Frontend Developer**
Info-Tech global
- Delivered a full-stack web application using React (frontend), owning features from database schema to UI rendering with optimizing frontend performance and API integration
 - Collaborated with backend engineers to design RESTful endpoints, ensuring seamless data flow across the stack

Projects

Wiki-Search [🔗](#)

HTML, CSS, Bootstrap, Java Script

Created a collaborative knowledge-sharing platform that replicates Wikipedia's core search and content creation features.

Finexo [🔗](#)

HTML, CSS, Bootstrap, Java Script

Designed a clean, static site to showcase company services with a professional, user-friendly layout.

Adidas Clone [🔗](#)

Angular, Bootstrap

Built a pixel-perfect, responsive clone of the Adidas website demonstrating strong attention to visual detail.

Jubari Clone [🔗](#)

Angular, Bootstrap

Replicated core features of a travel platform including destination browsing, pricing, duration filters, and group size displays.

News Today [🔗](#)

React, Tailwind, Axios, NestJS, Mongo DB

Developed a minimalist content platform for science, tech, health, and sports. Delivered a clean, responsive UI with seamless data fetching and backend integration.

EventBook [🔗](#)

React, Tailwind, Swiper, Axios, NodeJS, Mongo Db, Express

Built a complete ticket booking web app from scratch. Users can browse events, select tickets, and complete purchases online. Engineered an intuitive interface that makes booking fast and hassle-free for both organizers and attendees.
